

Mooring Inspection Certificate – Rockland Harbor

This certifies that a thorough inspection of your mooring tackle was conducted by my company on the date below. Service was performed as noted. The condition of the mooring tackle is determined by its actual condition on the date inspected and its usable service life for the two years following the inspection. Mooring type and construction must meet the Ordinances in the Rockland City Code, Chapter 9, the mooring must also be appropriate for the vessel assigned to the mooring site. A copy of this certificate must be filed with the City of Rockland Harbor and Waterfront Department.

Mooring Owner: _____

Mailing Address: _____

Date of Inspection: _____ **Mooring #:** _____ **Mooring Field:** _____

Mooring Location: Latitude _____ Longitude _____ Depth at MLW _____

Service inspection performed: Surface – barge Underwater

Mooring Type: Granite Concrete Embedded Anchor Other _____

Staple: Size: _____ Condition: New – Good – Fair – Unsatisfactory

Bottom Chain: Size: _____ Length: _____ Condition: New – Good – Fair – Unsatisfactory

Top Chain: Size: _____ Length: _____ Condition: New – Good – Fair – Unsatisfactory

Pennant: Size: _____ Length: _____ Condition: New – Good – Fair – Unsatisfactory

Pennant should be checked regularly by the owner, for chafing at the boat and the ball. This is the most common failure of mooring tackle, and the inspector can only judge it on the date the inspection was performed.
